

# MOHAMMAD SANAULLAH

Product Manager | Agile Execution | Data-Driven Analysis | Cross-Functional Collaboration  
+8801676695828 • msanaullahali07@gmail.com • linkedin.com/in/sanaullah-rabby-1377a21ab/ • Dhaka, Bangladesh

## Summary

Product Analyst with over a year of experience translating business needs into data-driven product decisions. Experienced in Agile delivery, product analytics, and cross-functional collaboration to improve user experience and business outcomes. Passionate about solving complex business problems through structured analysis, stakeholder collaboration, and continuous product improvement.

## Core Competencies

|                          |                                  |                     |                               |
|--------------------------|----------------------------------|---------------------|-------------------------------|
| · Business Strategy      | · Strategic Planning             | · Business Analysis | · Product Analytics           |
| · Stakeholder Management | · Cross-Functional Collaboration | · Agile Delivery    | · Data-Driven Decision Making |

## Experience

Bdjobs.com

### Product Analyst

07/2025 – Present

- Gathered business requirements and translated them into PRDs, BRDs, and measurable KPIs, ensuring alignment between business stakeholders and engineering teams.
- Coordinated Agile ceremonies including backlog refinement, sprint planning, task prioritization, and sprint execution to support timely product delivery.
- Developed Power BI dashboards to monitor product KPIs and project performance, enabling stakeholders to make faster, data-driven decisions.
- Refined and standardized 800,000+ job and application records, categorizing approximately 5,000 job titles into approximately 200 categories to enhance product and business scalability.
- Performed funnel analysis, cohort analysis, A/B testing, and user segmentation, leading to a 15% increase in feature adoption, 18% reduction in user drop-off, and 10% improvement in retention.
- Coordinated cross-functional teams to ensure task ownership and timely delivery of deliverables while supporting UAT and release processes.
- Leveraged SQL, Python, and Excel to analyze six years of customer and product data, delivering actionable insights for the Top 100 enterprise clients.

## Publications

IEEE Conference Publication — [ieeexplore.ieee.org/document/11013318](https://ieeexplore.ieee.org/document/11013318)

02/2025

### A deep-learning-based approach for object orientation estimation to solve MatchKey CAPTCHA using a Siamese Neural Network

Muhammad Samsuddin, Mohammad Sanaullah, Mahmudul Hassan

Implemented a Siamese Neural Network for object orientation estimation to solve MatchKey CAPTCHA, including dataset scraping, annotation, and model optimization.

## Projects

Data Analytics for Job Market Intelligence and Client Retention

01/2026

Analysed data to identify trends, customer behavior, and churn risk, aiding strategy, pricing, and retention.

- Led analysis of 800,000+ job records, standardizing approximately 5,000 job titles into approximately 200 product-ready job categories, enabling scalable job search, discovery, and recommendation features.
- Translated job title clustering and taxonomy insights into candidate matching and job recommendation use cases, improving relevance across core marketplace workflows.
- Analyzed multi-year application funnel data to identify demand trends, informing job posting strategy, pricing considerations, and revenue-impacting product decisions.
- Defined and monitored Top 100 enterprise customers using 6 years of usage and purchase data, delivering 2024–2025 client health and churn risk insights to support retention and account strategy.

Best CV

12/2025

Led product development, coordinating cross-functional teams for a data-driven candidate matching solution, enhancing hiring efficiency and job fit.

- Led the concept and development of Best CV, a hiring fulfillment solution designed to help employers reach high-fit candidates when job ads receive low-volume or low-quality applications.
- Authored the PRD, defined candidate selection logic using signals such as star candidate status, immediate availability, and job-description match percentage, and created wireframes and roadmap priorities for the product.
- Worked cross-functionally with 2 developers and 1 designer to drive execution, successfully measured by whether recommended candidates progressed to the interview stage, while also supporting Talent Search upsell within the Bdjobs recruiter product ecosystem.

## Projects

- A deep-learning-based approach for object orientation estimation to solve MatchKey CAPTCHA using a Siamese Neural Network 02/2025
- Optimized Siamese Neural Network for object orientation, boosting CAPTCHA accuracy through data prep and tuning.
- Collaborated on programming tasks, model training, hyperparameter tuning, and performance optimization.
  - Extracted and annotated datasets by scraping data from real-time web sources to support model development.
  - Contributed to academic writing and documentation using LaTeX, including formatting and content development.
- A Comprehensive Study on Widely Used Cryptographic Technique: RSA Algorithm 11/2021
- Implemented RSA algorithms for secure data encryption and decryption, applying math to real-world security cases.
- In this Academic Project, I have studied several mathematical aspects, such as the Greatest Common Divisor, Fermat's Little Theorem, and the Euclidean Algorithm of different Cryptographic models.
  - At last, how mobile banking uses cryptography to secure transactions and data is shown.

## Skills

Product Management:  
Requirement Gathering · PRD/BRD Documentation · Product Analytics · KPI Tracking · Metric Validation · UAT · Backlog Management · Delivery Support · Product Strategy Support

Business Analysis:  
Stakeholder Management · Cross-Functional Collaboration · Project Coordination · Data-Driven Decision Making · OKRs and Goal Alignment · Project Roadmap Planning

Data Analytics & Technical Skills:  
SQL · Python · Excel · Power BI · Funnel Analysis · Cohort Analysis · User Segmentation · A/B Testing · Churn Analysis · Pandas · NumPy · Matplotlib · Git · HTML · CSS

Tools & Platforms:  
Power BI · Google Analytics · GitHub · ClickUp · MongoDB · Firebase · Heroku

Methodologies:  
Agile · Scrum · SDLC · Waterfall

## Education

- Noakhali Science and Technology University Noakhali, Bangladesh  
**B.Sc. in Applied Mathematics** 01/2016 – 01/2022
- Jahangirnagar University Savar, Bangladesh  
**M.Sc. in Data Science and Applied Statistics** 12/2022 – 04/2024

## Extracurricular Activity

- NSTU Math Club  
**Founding Secretary** 07/2019 – 04/2022  
**NSTU Math Club**, a student-founded group, promotes mathematics and analytical thinking via events, workshops, and peer learning.
- YEF Global  
**Campus Ambassador** 02/2021 – 04/2022  
**YEF Global** fosters youth leadership, entrepreneurship, and skills via community engagement, training, and international collaboration.

## Training / Courses

- Advance Product Management: Vision, Strategy, and Metrics — Udemy
- Machine Learning Specialization by Andrew Ng — Coursera
- Machine Learning Zoom camp — DataTalksClub

## Language

- Bengali** **English**  
Native Speaker Proficient (IELTS-8)

## Interests

-  Reading  Coding  Debate
-  Sports  Data Analysis  User interface
